

Evening Brief

Date/Time Stamp: Sunday, August 16, 2015 - 10:31 PM

Weather Summary

Mild, stable and dry westerly flow continues across the north today. Further south temperatures are much warmer with highs near 100 degrees over western Nevada and over 110 in far southern Nevada. Winds will be generally light regionwide. Minimum RH is below 10% over southwest Idaho and much of Nevada.

A trough will quickly brush by the Northern Rockies on Monday/Tuesday bringing an increase in westerly winds along the Snake River Plain on Monday and northwest winds across much of Utah on Tuesday. Temperatures will cool across northern/central Utah under this increased northerly flow but this air mass will remain quite dry and somewhat stable.

Generally dry, west/northwest flow will continue across the region through the workweek with little to no thunderstorm activity expected during the period.

Preparedness Levels

Current:

Great Basin	4
National	5

Great Basin Fire Activity:

New Fires and Acres: 16 fires 8.2 acres

Light IA activity continues in Northern Nevada, Northern Utah and Idaho.

Resources:

GBCC is below draw-down.

There are no IMT's, Type 1 IHC's, National Caterers, Shower units, engines, crews, helicopters.

Great Basin Fire Potential Summary

Fire Danger will be moderating somewhat across the north with cooler temperatures, lighter winds and a lack of new lightning ignitions. The air mass remains dry however, with low afternoon RH.

Further south across southern Nevada and Utah the fire danger will be gradually increasing as the air mass dries out and fire danger indices increase.
